Bring smarter content to Cerner PowerChart® with ClinicalKey integration.

It’s real integration with real impact.

Integrate ClinicalKey and Cerner PowerChart® together to give your physicians instant access to the most clinically relevant, evidence-based medical and surgical information at the point of care.
Easy intranet linking.
With just a couple of clicks, physicians can access ClinicalKey’s books, journals, videos and more through your organization’s intranet.

Personalized knowledge from Infobutton integration.
ClinicalKey gives physicians quick access to information related to individual patient records, because it conducts searches based on the Infobutton HL7 standard queries provided by Cerner.

A simple interface for painless implementation.
ClinicalKey’s sophisticated API is designed to make usage and integration effortless. That means, from the moment you’re ready, Cerner PowerChart® and ClinicalKey will work together seamlessly.

Integrate with ClinicalKey to help your physicians:
• Reduce search time for a more efficient workflow
• Make faster, more accurate diagnoses
• Enhance the quality of care
• Improve patient engagement and satisfaction
• Reduce errors for cost savings and decreased readmissions

Have questions? We have answers.
To make this access available at your institution, please contact our ClinicalKey Technical Support team at CKTS@elsevier.com.
